

Memo from
JOSHUA LEDERBERG

To: Harriet Zeckman
SEP 23 1974 9/22/74

Alfred Thirsky

6/21/74

I was sorry to learn just now,
died about 2 months ago.

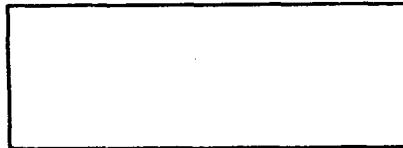

As you know he was a central
figure in the apotheosis of DNA. It
would be a shame if his papers disap-
peared like so many of his colleagues.

His widow who works at the
R.A. library might be more responsive
to suggestions from historians than
from more personal connections

All prey would very closely at
RA with Thirsky, may be another
useful contact.

M. P. SKY

Josh.
